Research Use Only Statement

Document ID: FLK-DOC-001 · Version: 1.0 · Issued: 2026-10-08 · Supersedes: none · Owner: FLASK

1. Scope

FLASK supplies lyophilized peptides and related reference materials for laboratory research use only. Every material listed on flaskpeptide.com is supplied on that basis and no other. This statement applies to every request, every shipment and every channel of correspondence, including email, messaging platforms and the request form.

2. Regulatory status of the materials

The materials are not medicines, not dietary supplements, not cosmetics and not medical devices. They have not been evaluated or approved by the United States Food and Drug Administration for any purpose. They are not intended to diagnose, treat, cure or prevent any condition, and they are not intended for use in humans or in animals.

Nothing published by FLASK, including product listings, specifications, certificates of analysis, batch records, articles in the Research Library, the laboratory concentration calculator, or correspondence, is a recommendation, an instruction or a suggestion to use any material in a living subject.

3. Who may request materials

- Persons at least 21 years of age.
- Persons obtaining the material for laboratory research use only.
- Persons located in a jurisdiction where the material may lawfully be received.
- Persons with the facilities and the competence to handle laboratory chemicals safely.

4. What FLASK does not provide

Not provided	What happens if requested
Dosage, dose ranges or dosing schedules	FLASK declines and refers the requester to the published literature. This applies on every channel.
Routes, methods or volumes of administration	
Syringes, needles, injection supplies or administration equipment	

Advice on use in humans or in animals
Medical, veterinary, pharmaceutical or legal advice

5. Confirmations made with every request

By submitting a request, the requester confirms that: the materials are being obtained for laboratory research use only; they will not be used in humans or in animals; the requester is at least 21 years of age; and the requester is not acting on behalf of any person who intends either of the first two confirmations to be untrue.

6. Restrictions accepted by the requester

- Not to use, or permit the use of, any material in a human or an animal.
- Not to resell, repackage or relabel any material for supply to consumers, or as a supplement, cosmetic, drug or medical device.
- Not to present a FLASK certificate of analysis or batch record as relating to material other than the lot it describes.

7. Destinations

FLASK is not able to ship to every jurisdiction. Where a request cannot be accepted, the request form indicates this when the location is selected. FLASK may also decline a request for reasons unrelated to location, including screening requirements applicable to FLASK and restrictions imposed by carriers. This statement does not list every restricted destination and is not a statement of the law in any jurisdiction; the requester is responsible for determining whether the materials may lawfully be received at the destination.

8. Enforcement

FLASK reviews every request before any fulfilment decision. Requests that do not meet this statement are declined. Where FLASK becomes aware after dispatch that a confirmation was untrue, no further requests from that requester are accepted.
